Request for Reconsideration

Detailed Action: **Election / Restrictions** (No paper number indicated).

Response to Office Communication (date mailed 07/05/2005).

Dear Sirs and Mams.

The specific patentable invention disclosed in this application, relates, on the one hand, to the steps comprising the process (method) which takes place in the embodiment therein so called the "Blast-Gun" (paragraphs: **[0099]**, **[0108]** and **[0128]**; corresponding to this application **Pub. No.: US 2005/0077055 A1** numerated paragraphs), and on the other hand, to the steps of providing the items, to connect or install this blast-gun, and to perform efficiently the operational needs and fire-fight activities in different physical fire sites scenarios, as depicted.

Said "Blast-gun" is disclosed, as an individual embodiment in its most complete version in last figure 10A (and respective plan view in figure 10B), and figures 3A, 4A, 5A, and 6, represent only its modified versions.

Additionally, because of the requirement to explain and demonstrate
